Dear Colleagues,

The Republic of Turkey, which was established on October 29, 1923, rose on the wings of science and technology, raising generations who are curious, questioning, researching, free of mind, free of conscience, and free of wisdom. As the Journal of Current Hematology & Oncology Research (JCHOR) team, we, as the scientists of the country, have been trying to carry the values of our Republic even further since we started our publishing life. JCHOR aims to present its readers with articles on new and exciting topics in the field of hematology and oncology in each issue. In our three issues published in 2023, we published 8 research articles, 4 reviews, and 5 case report articles. On the 100th anniversary of our Republic, as the Journal of Current Hematology & Oncology Research team, we wish you many more centenaries full of research. As Mustafa Kemal Atatürk said, “The rising new generation; the future is yours. We founded the Republic, you are the ones to elevate it and keep it alive !”.

Long live the Republic!

Prof. İlhami BERBER
Editor in Chief

ORIGINAL ARTICLES

The relationship between immunologic system and ferritin levels in patients with transfusion dependent thalassemia: a retrospective single-center study..... 79-82
Selim C.
